EPP Material

EPP is the abbreviation of a new type of foam plastic. The EPP beads must be filled with air at a certain pressure, and then injected into the EPP molding machine with compressed air through a spray gun, and molded by steam. After cooling, the mold is stabilized. That is, the epp product is obtained.

EPP CHILDREN'S THEME PARK

Business field series
This is a world of fun for children, where children shop,
learn and communicate, making the children feel as if
they are gathered in a dreamy space, allowing them to
enjoy endless happiness!

Detail display

Using Betta Imagination Playground Blocks, kids build a new world every day. They make objects like animals, rocket ships, and robots. They make imaginary places like houses, factories, and cities. They make new dramatic scenarios, settings, and games to play. Most important, they make the rules. Because Betta Imagination Playground Blocks is child-directed and open-ended, it encourages self-expression through deep, joyful play.

OTHER ITEMS

Utilizing the characteristics of EPP blocks, children's imagination and creativity can be brought into full play and combined into various objects.

OTHER ITEMS

We have been on the road, constantly exploring design updates, returning space to children, planning the relationship at all levels, achieving scientific planning and rational layout. Create a warm, clean and refreshing environment that is conducive to the growth of young children. Let the children be healthy and happy, and make the children the real masters of the environment.

CHARACTERISTICS OF YURT

As the crystallization of nomadic wisdom, the yurt is not only a form of architecture, but also the affiliation of the herdsmen. It has been deeply engraved into the cultural pattern of the nomads, and has been accompanied by generations on the grassland for a long time. For thousands of years, as a unique form in the history of human architecture, it has been continued and preserved with its irreplaceable appreciation and practicality.

3

advantage

- It is composed of plug-ins, which is very simple and convenient in installation and removal.
- Yurt can adapt to all kinds of weather
Air, anti-sunscreen, warm in winter and cool in summer
- Flexible use in various places, no need for long-term construction projects

ARCHITECT SERIES

The design of building castles, building gates and other similar products is inspired by the concept that "every baby is a craftsman in the mother's heart", and the purpose is to cultivate children's concentration and observation skills. The Architect series allows children to complete explorations in fields such as machinery, architecture, and biological structures through building blocks, and cultivates children's logical thinking and creative thinking abilities.

HANDS ON SERIES

The shape accumulation of different colors and blocky blocks can enhance children's color perception; the static blocks of different geometric shapes can enhance children's cognition of shapes and pictures. Products such as wall area wood, small cars, and elephants are all learned according to the path of children's natural foundation-image thinking-characteristic thinking-final products.

XIANGYUN SERIES

This series of products is mainly based on the children's floor pads, and the atmosphere of different environments is created through different shapes and different face-to-face combinations. It is not just the process of stacking the accumulation. After the establishment of the youth, it is a good opportunity to practice visual space and development logic. At the same time, the young pupae are classified according to the shape of the different ground pads, and the pupae will be extracted after the memory. The visual logic can be formed in the process.

PUZZLE SERIES

Through the combination of different modules to complete different plane shapes. Although children can imitate, but they don't like to follow and imitate others, they like to have their own style, often with some different opinions, answers, intentions and results. The jigsaw puzzle series give them space, and let the young ones fly in the sky. Nothing is more valuable than creation.
